

a184 id2 pro

Compromising on nothing there's 4 reasons that make the adidas eyewear range not just a sport accessory but a true performance product; the Vision, Fit, Protection and Durability concepts.

vision

Clima Cool™

ClimaCool™ technology by adidas is a dynamic ventilation technology. ClimaCool™ for eyewear (specially engineered vents on the frame) allows for air to be directed in a way that does not disturb the eyesight but manages moisture and prevents fogging providing a more comfortable wear throughout.

Performance Insert™

Ideal for those needing optical correction. The Performance Insert™ is also easily removed/reattached when required.

Nano-Foam™

The integrated use of nano-technology on the on the top foam construction prevents snow crystals and water from penetrating through to the lens.

Quick-Change Lens System™

Simple, fast but sturdy lens changing feature enabling wearer to adapt eyewear to all lighting and weather conditions.

fit

SPX™ front

Dual frame technology that ensures the goggles are compatible with any helmet as the front frame stretches out to fit the helmet. The front frame is made of the exceptional and robust SPX™ material.

Auto-Fit Nose Area™

The Auto-Fit feature allows for a perfect fit as the nose bridge area expands to fit any nose.

protection

Vision Advantage PC Lens™

The lightweight Polycarbonate lenses provide 100% UV protection, have strong resistance to impact forces and are of an optical quality 1 level.
